

ATMAIL WEBMAIL CLIENT

Atmail provides an enhanced Webmail platform for your existing mail-server via IMAP. Offer the Atmail interface to your existing users and provide more than just standard Webmail. CalDAV client and groupware included.

Connect.

Atmail allows users to access IMAP Mailboxes on any server of your choice. You and your users can experience webmail via a fluid, intuitive interface that excels aesthetically and functionally; a benchmark that very few webmail clients have achieved.

Share.

Staying in touch with business or personal contacts is made easy by the groupware features of Atmail. The easy-to-use calendar events, tasks, and free-busy scheduler provide collaboration and communication around the clock, with the simplicity of a browser-based interface.

Relax.

We made sure that the Atmail installation and administration process is as stress-free as possible - so much so that it won't take more than a minute of your time. Atmail Webmail plugs in directly to your IMAP servers with minimal configuration and requires very little, if any maintenance at all.

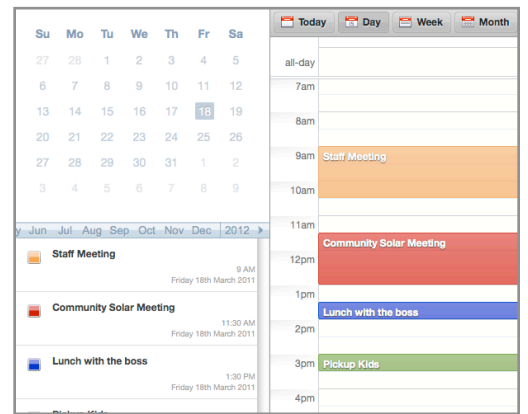

More than just your standard Webmail.

Use Atmail as a complete Webmail client for your organizations existing IMAP server. The software provides a comprehensive email-suite for accessing user mailboxes, and provides inbuilt Calendar and Address-book features.

The WebMail Client of Atmail supports any existing IMAP server running under a Unix, Linux or Windows systems.

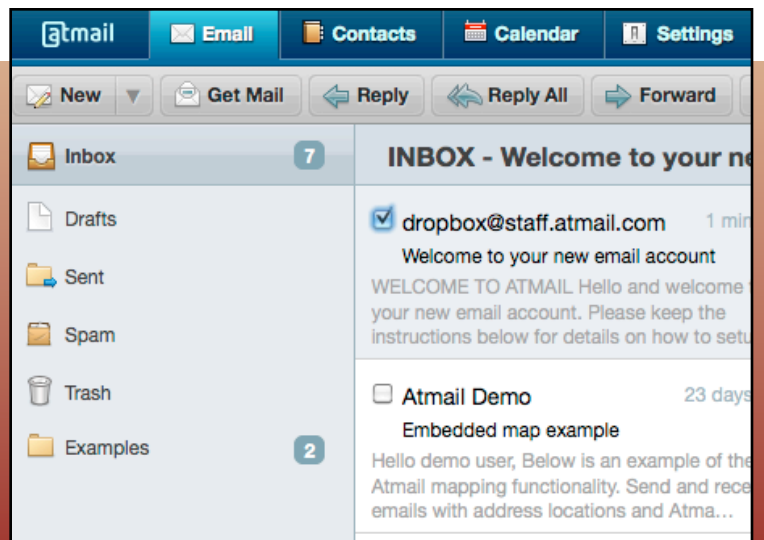

MOBILE FEATURES INCLUDED

CALENDARING MADE EASY

Atmail Webmail Client
Email, Groupware, and
Calendar made easy.

Software Version: 6

INDUSTRY USAGE

The Atmail Webmail Client is built for a wide range of industries and applications.

Small Business

Provide employees a complete Webmail interface to your organization's mail server. Use Atmail as a complete Webmail interface - allow staff to communicate easily, access the Calendar features for Groupware, Global Address-book and more. Optionally, replace your desktop email software and use a complete Web-based email platform.

Internet Service Providers

Implement Atmail as a site-wide Webmail client for ISP and Web-hosting clients. Provide more than just a standard Webmail client: offer Atmail and value add to your ISPs services.

Education

Provide Atmail for student and staff email services. Integrate the software into your University or School and provide campus-wide email communication.

By using Atmail, you can provide a complete Web-messaging platform of any size - for businesses, educational departments or ISP environments.
